DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of 1, 5, 6, 12, and 16 upon the elected Group I, species E1, species D, species Da in the reply filed on 04/28/06 is acknowledged. The traversal is on the ground(s) that the restriction requirement is not proper, and that the claims are not directed to independent inventions. This is not found persuasive because the following:

MPEP 808 cites the reasons for insisting upon a restriction requirement. The examiner not only showed separate classification but also the reasoning why said group were restrictable (i.e, process/apparatus; product/process of use). It is clearly to understand a burden to examiner exists when more than one invention is claimed and requires numerous class/subclass searches.

The requirement is still deemed proper and is therefore made FINAL.

An action on claims 1, 5, 6, 12, and 16 follows:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an

international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 5, 6, 12, and 16 are rejected under 35 U.S.C. 102 (e) as being anticipated by Tomito et al. (US 20030152231A1).

Regarding claims 1 and 16, Tomito et al. directs to a system/method including recording a user ID in a card, recording ID setting instructions, executing ID setting instructions, and creating an ID distinctive to the apparatus, the ID usable to acquire the release key (Tomito et al., abstract; page 4, paragraphs 0049 and 0054).

As to claim 5, the ID is the card user identification.

As to claim 6, Tomito et al. teaches the parameter related to the apparatus is registered home location of the apparatus (Tomito et al., page 5, paragraph 0054).

As to claim 12, Tomito et al. directs to a system/method including recording a user ID in a card, recording ID setting instructions, executing ID setting instructions, and creating an ID distinctive to the apparatus, the ID usable to acquire the release key (Tomito et al., abstract; page 4, paragraphs 0049 and 0054). Tomito et al. further discloses determining a present position via the GPS system (Tomito et al., page 5, paragraph 0054, lines 17 and 18). Tomito et al. fails to point out the act of determining a date and time, however, such feature is inherently disclosed because while reading the user ID, the date and time would be recorded by the apparatus (1) (Tomito et al., figure 1; abstract; page 8, paragraph 0088).
